

2019 Spring Softball

Colman Field

The Colman ball field infield is a dark colored ag-lime to prevent rainouts and improve drainage on the field. The Parks also has shade structures over the players bench to improve the view for spectators, and to keep the players in the shade. There have also been new foul poles installed with wings to help umpires make calls on balls hit down the base line. We have a pitching screen as an optional piece of safety equipment to protect the players on the field.

We hope that all players enjoy the improvements and safety features of Colman field in the 2019 season!
